

Fafard #1P

This is an excellent general purpose mix that has good drainage. It can be used for seeds, plugs, cuttings, flowering plants, bedding plants, hanging baskets, foliage, and interiorscape.

- Ingredients:
- Sphagnum peat moss
 - Horticultural perlite
 - Wetting agent
 - Starter nutrients

Item #	Description	Size	Qty/Pit	Price/Unit
12-0540Q	Fafard #1P	2.8 cu.ft.	51	\$14.10
12-0540T	Fafard #1P	64 cu.ft.	2	\$300.72

Fafard Super-Fine Germinating Mix

This mix has fine texture, good drainage, and good water holding capacity. It can be used for seeds, plugs, cuttings, flowering plants, bedding plants, hanging baskets, and foliage.

- Ingredients:
- Sphagnum peat moss
 - Horticultural perlite
 - Horticultural vermiculite
 - Wetting agent
 - Starter nutrients

Item #	Description	Size	Qty/Pit	Price/Unit
12-0653	Fafard Superfine Germinating Mix	2.8 cu.ft.	51	\$15.29
12-0653A	Fafard Superfine Germinating Mix	64 cu.ft.	2	\$326.18

Fafard #3B

This is an excellent general purpose mix. It can be used for flowering plants, bedding plants, hanging plants, foliage, interiorscape, cuttings, and seeds.

- Ingredients:
- Peat moss
 - Perlite
 - Vermiculite
 - Processed pine bark

Item #	Description	Size	Qty/Pit	Price/Unit
12-0660	Fafard #3B	2.8 cu.ft.	48	\$14.02
12-0577S	Fafard #3B	60 cu.ft.	2	\$283.21

Fafard #3

This is a coarse and well - drained mix. It can be used for flowering plants, hanging baskets, foliage, interiorscape, containers and bedding plants.

- Ingredients:
- Processed pine bark
 - Peat moss
 - Vermiculite
 - Perlite

Item #	Description	Size	Qty/Pit	Price/Unit
12-0630	Fafard #3	2.8 cu.ft.	42	\$13.79
12-0755S	Fafard #3	60 cu.ft.	2	\$278.63

Fafard #52

This is a coarse and well - drained mix. It can be used for flowering plants, hanging baskets, foliage, interiorscape, containers and bedding plants.

- Ingredients:
- Processed pine bark
 - Peat moss
 - Vermiculite
 - Perlite

Item #	Description	Size	Qty/Pit	Price/Unit
12-0650	Fafard #52	2.8 cu.ft.	42	\$13.24
12-0760B	Fafard #52	55 cu.ft.	2	\$245.22

Fafard Nursery Mix

This is a coarse and well-drained mix. It can be used for new lawns, lawn repair, shrubs and trees, vegetable gardens, flower gardens, and mulching.

Ingredients: • Processed pine bark • Peat moss

Item #	Description	Size	Qty/Plt	Price/Unit
12-0760	Fafard Nursery Mix	2.8 cu.ft.	42	\$12.69
12-0760C	Fafard Nursery Mix	55 cu.ft.	2	\$235.05

Fafard #3M

This is a coarse and well-drained mix. It can be used for new lawns, lawn repair, shrubs and trees, vegetable gardens, flower gardens, and mulching.

Ingredients: • Processed pine bark • Peat moss
• Vermiculite • Perlite.

Item #	Description	Size	Qty/Plt	Price/Unit
12-0631	Fafard #3M	2.8 cu.ft.	48	\$13.96
12-0632	Fafard #3M	60 cu.ft.	2	\$282.06

Fafard #4

This is an excellent general purpose mix that has good capillary action. It can be used in flowering plants, cuttings, seeds, bedding plants, hanging baskets, foliage, and interiorscape.

Ingredients: • Peat moss • Vermiculite
• Processed pine bark.

Item #	Description	Size	Qty/Plt	Price/Unit
12-0578	Fafard #4	2.8 cu.ft. loose-filled bag	48	\$13.77
12-0756	Fafard #4	60 cu.ft.	2	\$278.23

Fafard #4M

This is an excellent general purpose mix with finer texture and allows it to hold more water. It can be used in flowering plants, cuttings, seeds, bedding plants, hanging baskets, foliage, and interiorscape.

Ingredients: • Peat moss • Vermiculite
• 3/8" processed pine bark

Item #	Description	Size	Qty/Plt	Price/Unit
12-0579M	Fafard #4M	2.8 cu.ft. loose-filled bag	48	\$14.08
12-0756M	Fafard #4M	60 cu.ft.	2	\$284.37

Fafard #4P

This is an excellent general purpose mix with medium texture and good capillary action. It can be used in flowering plants, cuttings, seeds, bedding plants, hanging baskets, foliage, and interiorscape.

Ingredients: • Peat moss • Perlite
• Vermiculite • Processed pine bark

Item #	Description	Size	Qty/Plt	Price/Unit
12-0579	Fafard #4P	2.8 cu.ft. loose-filled bag	48	\$14.02
12-0579B	Fafard #4P	60 cu.ft.	2	\$283.21

Fafard GM #F15 (Compressed Bale & Loose Filled Bag)

An economy mix backed up by Fafard's technical expertise and attention to quality. A compressed bale mix that delivers real value! It is an excellent general purpose that has good air space and good drainage. It can be used in bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, and interiorscape.

- Ingredients:
- Peat moss
 - Perlite

Item #	Description	Size	Qty/Plt	Price/Unit
12-0543	Fafard GM F15	3.8 cu.ft.bale	30	\$26.26
12-0545	Fafard CF-15	2.8 cu.ft. loose-filled bag	51	\$12.65

Fafard GM #1-PV (Compressed Bale & Loose Filled Bag)

This is an excellent economical general purpose mix. It can be used in bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, and interiorscape.

- Ingredients:
- Peat
 - Perlite
 - Vermiculite

Item #	Description	Size	Qty/Plt	Price/Unit
12-0708	Fafard GM 1-PV	3.8 cu.ft.bale	30	\$28.76
12-0707	Fafard C1-PV	2.8 cu.ft. loose-filled bag	51	\$13.66

Fafard GM #1-P (Compressed Bale & Loose Filled Bag)

This is an economical general purpose mix that has good air space and good drainage. It can be used in bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, and interiorscape.

- Ingredients:
- Peat moss
 - Perlite

Item #	Description	Size	Qty/Plt	Price/Unit
12-05400	Fafard GM 1-P	3.8 cu.ft.bale	30	\$28.50
12-0705	Fafard C1-P	2.8 cu.ft. loose-filled bag	51	\$13.56

Fafard GM #2 (Compressed Bale & Loose Filled Bag)

This is an economical general purpose mix that has good air space and good drainage. It can be used in bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, and interiorscape.

- Ingredients:
- Peat moss
 - Perlite
 - Vermiculite

Item #	Description	Size	Qty/Plt	Price/Unit
12-0551	Fafard GM 2	3.8 cu.ft.bale	30	\$29.92
12-0706	Fafard C-2	2.8 cu.ft. loose-filled bag	51	\$14.75

Canadian Sphagnum Peat Moss

Fibrous, clean, and delivered

Fafard grower peat moss is a great organic soil enhancer for all grower needs. Grown in our own peat bogs in New Brunswick and Ontario, Canada, Fafard grower peat moss is a premium organic matter that will enrich your planting environment. Fafard grower peat moss will condition clay soils to hold more water and provide better aeration around plant roots as well as keeping hard and/or dry soils from clumping. Peat moss also gives body to sandy loam soils and provides better water retention. It will also help the pH of the alkaline soils and absorb nutrients and hold them until the plant can use them. Peat moss is an excellent base for compost and potting mixes. Most Fafard potting, planting, and professional mixes contain Fafard Canadian sphagnum peat moss.

Metro-Mix 200 (2.8 cu.ft. / 60 cu.ft.)

Excellent for seed starting, cutting propagation, cutting production, and growing on small transplants. Works well in sub irrigation systems and is lightweight for ease of handling in landscaping applications.

- Ingredients:
- Medium grade horticultural vermiculite
 - Choice Canadian sphagnum peat moss
 - Horticultural perlite
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
12-0100	Metro Mix 200	2.8 cu.ft.	48	\$17.54
L10070	Metro Mix 200	60 cu.ft.	2	\$356.17

Metro-Mix 250 (2.8 cu.ft. / 60 cu.ft.)

Good choice for 2-1/4" to 5" potted crops as well as propagation and growing on applications.

- Ingredients:
- Medium grade horticultural vermiculite
 - Choice Canadian sphagnum peat moss
 - Processed bark ash
 - Horticultural perlite
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
12-0095	Metro Mix 250	2.8 cu.ft.	48	\$16.14
L10090	Metro Mix 250	60 cu.ft.	2	\$326.87

Metro-Mix 360 (2.8 cu.ft. / 60 cu.ft.)

A proven medium for potted plants, bedding plants and hanging basket production. Exceptional for propagation of seeds, cuttings, and "direct stick" applications. Effective for sub irrigation and drip systems.

- Ingredients:
- Medium grade horticultural vermiculite
 - Choice Canadian sphagnum peat moss
 - Processed bark ash
 - Pine bark in some regions
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
12-0103	Metro Mix 360	2.8 cu.ft.	45	\$15.27

Metro-Mix 360 Coir Growing Medium (2.8 cu.ft. / 60 cu.ft.)

Product uses: for potted plants, bedding and hanging basket production, for propagation of seed cuttings and 'direct-stick' applications or with overhead, sub irrigation and drip systems.

- Ingredients:
- Specially processed coconut coir pith
 - Horticultural grade vermiculite
 - Processed bark ash
 - Choice Canadian sphagnum peat moss
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
12-0130	Metro Mix 360 w/ coir	2.8 cu.ft.	45	\$15.25
12-0103F	Metro Mix 360 w/ coir	60 cu.ft.	2	\$278.68

GROWING MEDIA

Use pricing as a guide. Pricing is always subject to change without notice.

Metro-Mix 366 (2.8 cu.ft. / 60 cu.ft.)

Medium density mix with appropriate aeration, percolation, and nutrient retention characteristics for a wide range of bedding and pot crops.

- Ingredients:
- Choice Canadian sphagnum peat moss
 - Medium grade horticultural vermiculite
 - Composted pine bark
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
L10140	Metro Mix 366	2.8 cu.ft.	40	\$16.05
L10150	Metro Mix 366	60 cu.ft.	2	\$313.39

Metro-Mix 366 Coir Growing Medium (2.8 cu.ft. / 60 cu.ft.)

Product uses: For cuttings and 'direct-stick' applications, growing on medium for a wide range of crops and container sizes, or use with overhead, sub irrigation, and drip systems.

- Ingredients:
- Specially processed coconut coir pith
 - Medium grade horticultural vermiculite
 - Composted pine bark

Item #	Description	Size	Qty/Plt	Price/Unit
L10160	Metro Mix 366 w/ coir	2.8 cu.ft.	39	\$17.37
L10170	Metro Mix 366 w/ coir	60 cu.ft.	2	\$330.13

Metro-Mix 366-P Coir Growing Medium (2.8 cu.ft. / 60 cu.ft.)

Product uses: For cuttings and 'direct-stick' applications, growing on medium for a wide range of crops and container sizes, or use with overhead, sub irrigation, and drip systems.

- Ingredients:
- Specially processed coconut coir pith
 - Medium grade horticultural vermiculite
 - Composted pine bark
 - Horticultural perlite

Item #	Description	Size	Qty/Plt	Price/Unit
12-0149	Metro Mix 366-P w/ coir	2.8 cu.ft.	40	\$12.44
L10200	Metro Mix 366-P w/ coir	60 cu.ft.	2	\$347.70

Metro-Mix 380 (2.8 cu.ft. / 60 cu.ft.)

Excellent, moderately coarse mix with outstanding aeration, percolation, and nutrient retention characteristics. Excellent for potted plants, bedding plants, hanging basket production, landscape applications, garden mums and stock plants.

- Ingredients:
- Composted pine bark
 - Medium grade horticultural vermiculite
 - Choice Canadian sphagnum peat moss
 - Horticultural perlite

Item #	Description	Size	Qty/Plt	Price/Unit
12-0132E	Metro Mix 360	2.8 cu.ft.	45	\$13.83
12-0132G	Metro Mix 360	60 cu.ft.	2	\$280.41

Metro-Mix 380 Coir Growing Medium (2.8 cu.ft.)

Product uses: Excellent for potted plants, bedding plants and hanging basket production, preferred for some landscape applications and ideal for garden mums and stock plants.

- Ingredients:
- Composted pine bark
 - Choice Canadian sphagnum peat moss
 - Horticultural perlite

Item #	Description	Size	Qty/Plt	Price/Unit
12-0132D	Metro Mix 380 w/ coir	2.8 cu.ft.	40	\$14.38

Metro-Mix 500 (2.8 cu.ft. / 60 cu.ft.)

The right choice for larger greenhouse containers and perennial production. This mix is especially well suited where excellent aeration and rapid percolation are desired. An excellent choice for growers unfamiliar with soilless mix that fear over watering.

- Ingredients:
- Composted pine bark
 - Medium grade horticultural vermiculite
 - Choice Canadian sphagnum peat moss
 - May contain processed bark ash

Item #	Description	Size	Qty/Plt	Price/Unit
12-0104B	Metro Mix 500	2.8 cu.ft.	40	\$13.98
L10240	Metro Mix 500	60 cu.ft.	2	\$312.18

Metro-Mix 510 (2.8 cu.ft. / 60 cu.ft.)

Proven performer with large container specimen plants and large grown in planters. Well suited where excellent aeration and rapid percolation are important. The additional bark ash provides greater nitrogen retention and aeration.

- Ingredients:
- Select, composted pine bark
 - Medium grade horticultural vermiculite
 - Choice Canadian sphagnum peat moss
 - Processed bark ash
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
12-0105	Metro Mix 510	2.8 cu.ft.	39	\$14.30
12-0105A	Metro Mix 510	60 cu.ft.	2	\$246.68

Metro-Mix 560 Coir Growing Medium (2.8 cu.ft. / 40 cu.ft.)

Product Uses: For greenhouse and perennial production, for large specimen plants and large plants grown in planters, and for overhead, sub irrigation and drip systems.

- Ingredients:
- Composted pine bark
 - Specially processed coconut coir pith
 - Choice Canadian sphagnum peat moss
 - Processed bark ash
 - Horticultural perlite
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
12-0131	Metro Mix 560 w/ coir	2.8 cu.ft.	36	\$14.73
12-0131B	Metro Mix 560 w/ coir	40 cu.ft.	2	\$168.72

Metro-Mix 700 (2.8 cu.ft. / 40 cu.ft.)

The coarser physical properties provide maximum resistance to media settling and attrition due to media handling equipment. Excellent coarse medium for potted plants, hanging basket and perennial production, and is preferred in some landscape applications.

- Ingredients:
- Composted pine bark
 - Choice Canadian sphagnum peat moss
 - Medium grade horticultural vermiculite
 - Horticultural perlite
 - Proprietary starter nutrient charge and other ingredients

Item #	Description	Size	Qty/Plt	Price/Unit
12-0133A	Metro Mix 700	2.8 cu.ft.	40	\$12.30
L10275	Metro Mix 700	40 cu.ft.	2	\$214.70

GROWING MEDIA

Metro-Mix 702 (2.8 cu.ft. / 40 cu.ft.)

Coarse growing medium with excellent aeration, percolation, and nutrient retention characteristics. Used by growers as a coarse bedding plant mix. It is a coarse medium for potted plant and hanging basket production and a good choice for potting machines.

- Ingredients:
- Bark
 - Canadian Sphagnum Peat Moss
 - Horticultural Grade Vermiculite
 - Horticultural Grade Perlite
 - Starter Nutrient Charge
 - Dolomitic Limestone
 - Wetting Agent

Item #	Description	Size	Qty/Plt	Price/Unit

12-5065	Sunshine SB 500 High Porosity	60 cu.ft.	2	\$301.61

Soil Amendments

Long Fiber Sphagnum Moss (From Wisconsin)

One of nature's most valuable gifts to gardeners. Heavy fibered, fluffy, clean. Absorbs and retains up to 20 times its weight in water, twice as much as a cellulose sponge. Excellent for use in hanging baskets, as pot fillers and soilless gardening. Invaluable for any gardening project such as transplanting, growing bulbs, ending soil erosion, rooting cuttings and soil mixes.

Coarse Perlite

Inorganic soil rebuilder that improves soil structure by providing increased aeration and water holding capacity yet reduces soil compaction for superior plant growth. It is screened to remove fine particles. Also available in 60 cu.ft. bags.

Vermiculite

Medium grade is widely used for plug mixes, finer graded soilless mediums, germination and rooting. The coarse grade is used when higher aeration characteristics are required. Both exhibit the highly desirable characteristics of lightweight and the capacity of moisture and nutrient retention. Great for lateral water movement in a mix.

Aged Pine Bark

Composted southern pine bark used as an organic soil conditioner. This is also available in 60 cubic feet.

PBH Growing Medium Material from Riceland

The rice co-product with the natural size, shape and bulking properties to create optimum aeration, water-holding-capacity and drainage in your greenhouse media. Blend this renewable, biodegradable amendment with peat or coir to meet a range of growing requirements. Uniquely processed and sterilized, dust-free PBH contains no viable weed seeds or disease pathogens. Extremely lightweight and compressed when packaged, PBH requires less storage space, less handling, and lowers freight costs. Call for pricing.

WaterWorks Crystals

Water-holding polymer that absorbs up to 400 times its weight in rain or irrigation water, as well as a percentage of water-soluble nutrients and fertilizers

Item #	Description	Bag Size	Qty/Plt	Price/Unit

13-0030	WaterWorks Crystals	55 lb.	–	\$322.20

Greenhouse Media - Standard and Custom

Greenhouse mixes are formulated with components and particle sizing with the pot or container size in mind.

Because you may grow plants in containers that range from small cells to large planters, one growing mix will not suit all your requirements. Media characteristics such as air space, available water and total porosity will change with the size of the container. There are also specialty blended Coir mixes available.

All our professional greenhouse mixes are pH balanced and contain dolomitic lime, wetting agent and a starter fertilizer charge. Additionally, they are all blended and tested for optimum physical and chemical characteristics.

Nursery Media - Custom designed to meet your needs.

Nursery mixes are high quality, bark based growing mixes for professional nurseries.

Blended with composted southern pine bark, Canadian sphagnum peat moss, perlite, rice hulls, slow release fertilizers and wetting agents. Our nursery mixes can be screened, sized and blended for your particular container size, crop requirements and cultural practices.

You want healthy, vigorous plants with fast developing root systems. We design mixes that help you achieve that. Bulk and custom mixes available -- please call for more information.

PRO-MIX[®] by Premier Horticulture

QUALITY Professional Growing Media

PRO-MIX 'BX' GENERAL PURPOSE GROWING MEDIUM WITH BIOFUNGICIDE

PRO-MIX 'BX' with BIOFUNGICIDE is a "General Purpose" peat-based professional growing medium, designed for the cultivation of horticultural plants. This formulation is lightweight, uniform and provides necessary conditions to establish plant growth. Enriched with Subtilex[®], a high-performance biofungicide that prevents root diseases caused by pathogens, such as pythium, fusarium and rhizoctonia.

Components:

Canadian sphagnum peat moss (75-85%/vol.) • *Bacillus subtilis* - MBI600 (biofungicide) • Perlite — horticultural grade • Vermiculite • Dolomitic & Calcitic Limestone (pH adjuster) • Macronutrients • Micronutrients • Wetting Agent.

PRO-MIX 'PGX' PLUG AND GERMINATION GROWING MEDIUM

PRO-MIX 'PGX' is a peat-based growing medium for germination and growing-on seedlings with plug systems. Growth under high-density conditions requires a highly specialized medium that can provide optimum physical and chemical properties.

Components:

Canadian sphagnum peat moss - short fiber(65-75% / vol.) • Vermiculite - plug grade • Dolomitic & Calcitic Limestone • Macronutrients • Micronutrients • Wetting Agent.

PRO-MIX/MYCORISE[®] PRO

PRO-MIX 'BX' / Mycorise[®] PRO GENERAL PURPOSE GROWING MEDIUM

PRO-MIX 'BX'/Mycorise[®] PRO is a "General Purpose" peat-based growing medium with vermiculite and perlite, used for the cultivation of a wide variety of plant species. Mycorise[®] PRO ensures stronger, healthier plants due to more developed root systems and better fertilizer uptake.

Components:
Canadian sphagnum peat moss (75-85%/vol.) • *Endomycorrhize* (Mycorise[®] PRO) • Perlite — horticultural grade • Vermiculite • Dolomitic & Calcitic Limestone (pH adjuster) • Macronutrients • Micronutrients • Wetting Agent.

PRO-MIX 'BRK' / Mycorise[®] PRO PEAT/BARK-BASED GROWING MEDIUM

PRO-MIX 'BRK'/ Mycorise[®] PRO is a "Peat/Bark-based" growing medium offering the renowned quality and consistency of PRO-MIX. Its processed Pine bark adds weight and reduces water retention of media while its quality Sphagnum peat moss ensures optimal balance between air and water. This mix resists long-term compaction and improves container stability. Mycorise[®] PRO ensures stronger, healthier plants due to more developed root systems and better fertilizer uptake.

Components:
Canadian sphagnum peat moss (40-50%/vol.) • *Endomycorrhize* (Mycorise[®] PRO) • Processed Pine Bark (35-45%/vol.) • Perlite — horticultural grade • Dolomitic & Calcitic Limestone (pH adjuster) • Macronutrients • Micronutrients • Wetting Agent.

PRO-MIX 'GSX' / Mycorise[®] PRO GREENHOUSE SELECT GROWING MEDIUM

PRO-MIX 'GSX'/ Mycorise[®] PRO is a "Medium-Weight", peat/bark-based growing medium designed for the cultivation of horticultural plants with sub irrigation and automated watering systems. Its blend of Sphagnum peat moss, composted Spruce bark, and coarse perlite forms a porous growing medium which allows optimum water drainage and air exchange. Mycorise[®] PRO ensures stronger, healthier plants due to more developed root systems and better fertilizer uptake.

Components:
Canadian sphagnum peat moss (55-65%/vol.) • *Endomycorrhize* (Mycorise[®] PRO) • Composted Spruce Bark (25-35%/vol.) • Perlite — horticultural coarse grade • Dolomitic & Calcitic Limestone • Macronutrients • Micronutrients • Wetting Agent.

National Cocoa | Retail Soils

Cocoa Shell Mulch

Made from the shell of cocoa beans during the roasting process, cocoa shell mulch is excellent for retaining water, forming vital nutrients, combating weeds, and deterring snails and slugs. Aromatic cocoa shell can be used anywhere in your landscaping, garden, or flower beds.

Why Sell Cocoa Shell Mulch

- Chocolate aroma - creates a positive association (Everyone loves chocolate!)
- Holds moisture
- Easy maintenance - just dress the top and the shell is like new
- Retards weed growth
- Loosens and adds nutrients to the soil
- No wood related insects
- Dark color is unphased by the bleaching sun
- Insulates roots from extreme temperatures
- Environmentally friendly recycled product
- Deters deer, slugs, and snails
