NOW HIRING PLANT SALES REP

BFG Supply is the largest Midwestern distributor of greenhouse and nursery supplies. We are expanding our plant sales department and are looking for sales reps to work in the following territories: IL/WI, IN/OH, and MI. Prior plant

sales experience would be desired, but is not necessary. We require at least 3 years of industry experience in related areas. Excellent compensation, incentive plan, & benefits commensurate with experience. Home office is acceptable if

not located near one of our warehouses. EOE. Send resume and salary requirements to: hireme@bfgsupply.com or BFG Supply Co., Attn: Human Resources, 14500 Kinsman Rd., Burton, OH 44021.

2008 BFG Hort Expos – Don't miss 'em!!

Join us for the buying events of the year!

Plants Plus

Our Plants Plus Program offers special rewards to BFG Plant Connection customers. With only a \$2,500 purchase of plants from over 90 plant suppliers, it's easy to qualify for special rewards from key suppliers.

Funny Money

Every dollar you spend at this year's Hort Expos counts toward our "Funny Money" rewards program. Redeem "Funny Money" for a wide range of items including gift cards from your favorite retailers. You are going to need growing supplies, so why not book them and get rewarded!

Educational Seminars

We're bringing together some of the best speakers in the industry with topics for greenhouses, nurseries, garden centers and landscapers to help keep you informed and educated. Don't miss speakers from Syngenta, Euro American, GrowerTalks and many more!

Green Solutions

BFG's Green Solutions Chemical Program offers a unique way to gain additional year round discounts and other benefits on your chemical purchases.

THINK GREEN!

Think Environmentally Friendly.

BIOPOTS

Item #	Description	Qty/Cs	Price/Cs
02-7100*	3 1/2" Grower Pot	465	\$71.61
02-7105*	4 1/2" Grower Pot	270	\$76.68

*Only in stock at BFG's Kalamazoo, MI, and Minneapolis, MN warehouses.

OTHER SIZES AVAILABLE FALL 2008		
Item #	Description	Qty/Cs
BP101	4" Grower Pot	465
BP102	6" Grower Pot	192
BP103	8" Grower Pot	114
BP105	2.5" Grower Pot	840
BP201	1 Gallon Pot	84

CALL FOR QUANTITY PRICING AND AVAILABILITY

In response to the green movement, we have started to stock biodegradable Belan rice pots. The Biopots are made from straw, rice husks and bamboo – all sustainable. Planting plants in Biopots is as simple as it is for plants grown in plastic pots.

Biopots come in an array of sizes, and because they are imported, must be ordered in the fall to guarantee timely delivery. We are stocking two sizes this summer for trials, and will be pre-booking all sizes later at our trade shows.

We have only one planet. It is fundamental that the people living on earth protect the natural resources and our environment. Choose to preserve our environment by using Biopots in your growing operation.

In Ground & AGS (Above Ground System)

Pot-in-Pot

Every day there is more and more need for better, more efficient growing systems; now add more environmentally responsible methods.

Designed specifically for pot-in-pot applications, not adapted from some other stock product, Nursery Supplies' Grip-Lip containers remain the best choice for in-ground and above ground pot-in-pot growing.

Used in a growing or finishing field, this method promotes increased, controlled growth. The initial investment in product and time pays off quickly in return on investment and greatly reduced impact on the environment.

- Light-weight liner pot does not remove native top soil at harvesting
- Reduction of fertilizer run-off
- Re-use of the heavy socket pot with a light weight insert pot for source reduction
- Root ball maintains better temperatures
- Control the variables – media, fertilizer, water
- Consistent, confined root ball growth

Harvesting happens anytime - no hard soils to dig into, no root damage - simply lift the pot out of the socket. How easy is that!

Pot-in-Pot can be used effectively by every grower.

Trade Size	Approx Caliper*	Socket Pot	Liner Pot
#7	1 1/2"	GL2800	EG2800/2800CU
#15	2"	GL6900	EG6900/6900BXL
#25	2 1/2"	GL10000	EG10000/10000BXL
#45	3"	18000CL	18000CL

*These are approximate; caliper varies greatly with plants species.

Above Ground System

The driving force for the design of the AGS – the Above Ground System for Pot-in-Pot – versatility.

The spacing of the socket pots and the configuration are easily modified or completely changed to accommodate varying crops and growing cycles.

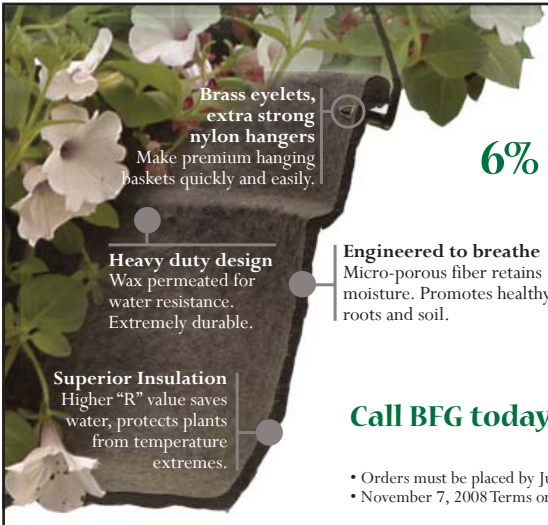

Simple to install, just place on the ground, or pavement or clay! Surround with a cooling media and arrange the watering system.

Done.

Grip-Lip-AGS	Use Liner	Trade Size	Top Dia.	Bottom Dia.	Height
AGS 2800	2800 Series	#7	15 1/4"	19 1/2"	12 1/2"
AGS 6900	6900 Series	#15	17 1/4"	22 3/4"	17 1/4"

Another application for the AGS socket pot is retail presentation. The crop stands, reducing damage, and air circulation around the liner area encourages more consistent temperatures.

Brass eyelets, extra strong nylon hangers
Make premium hanging baskets quickly and easily.

Heavy duty design
Wax permeated for water resistance. Extremely durable.

Superior Insulation
Higher "R" value saves water, protects plants from temperature extremes.

Engineered to breathe
Micro-porous fiber retains moisture. Promotes healthy roots and soil.

No Better Time To Buy!

Nesting Shopping Cart
 #48-6501 **\$279.00_{ea}**

22" x 32" Nesting Shopping Cart shelves are electro galvanized before final powder coat finish. They have a hot dipped frame and 8" pneumatic wheels. The top shelf folds up to make room for nursery stock.

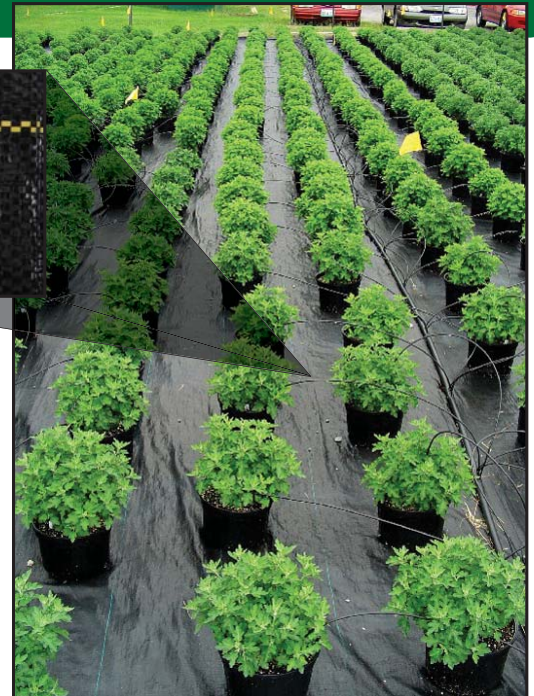

Value-priced products you can grow with.

BFG has created the Grower Select line of products to bring popular products to market with value pricing. The Grower Select line includes growing media, carts, pots, benches, greenhouses and more.

Groundcover Special

Woven Polypropylene Ground Cover

The woven-mesh allows water to seep through, which prevents bacteria and fungus caused by standing water, while at the same time inhibiting most weed growth. It resists tears and punctures for years, and will not rot. UV stabilization prevents breakdown in exposed areas. **This is a full 3.2 oz. material.** Lines every 12" for easy lining of stock. Use 8" anchor pins to secure.

Slam Spider Mites This Summer

Pylon™

Pylon is a new unique miticide for indoor use. With translaminar systemic abilities, Pylon offers contact control as well as long residual control up to 27 days. Pylon gives excellent control of most mite species including: two-spotted spider mite, apple rust mite, broad mite, carmine spider mite, citrus budmite, citrus rust mite, cyclamen mite, pear rust mite, and the Pacific spider mite. The rate is 2.6 to 5.2 per 100 gallons. See label for details.

\$447.25* each

#19-0236 1 pint

Floramite® SC

Floramite SC Ornamental Miticide provides outstanding control of a variety of mite pests on ornamental plants indoors and outdoors. Floramite SC is effective on a variety of mites and all life stages of Tetranychid spider mites.

Floramite SC produces quick knockdown through contact activity and long residual control of more than 21 days. Floramite SC is easy on predacious mites and beneficial insects, making it ideal for use in IPM and resistance management programs.

\$265.00* each

#19-0063 1 quart

Judo™

Judo is a miticide and insecticide in a new chemical class (tetrionic acids) with a new mode of action that is highly effective against a wide range of mites and whiteflies. Judo affects all development stages of mites and whiteflies (including eggs and transformation stages). Judo is translaminar and moves readily through the leaf tissue. Judo provides extended residual control of mites (30+ days) and whiteflies (21+ days).

\$339.95* each

#19-0238 8 ounces

*Special prices good through July 31, 2008

NEW Pageant™ Fungicide

Introducing THE Fungicide for Ornamentals

Pageant™ fungicide is a broad-spectrum fungicide combining two fast-acting active ingredients, Boscalid and Pyraclostrobin, into one product that offers **more control on more diseases than any other currently registered fungicide.**

As the broadest spectrum foliar fungicide for ornamental plants on the market, Pageant fungicide has activity on all four classes of fungi and provides excellent control against phytophthora and downy mildew diseases. **This fast-acting formula starts working within minutes of application.** For more information, visit www.betterplants.com.

\$67.00

#19-0554D 1 lb. container. Use rates: 4-18 oz. per 100 gallons.

REI: 12 hours. For indoor and outdoor use.

DANIELS PLANT FOOD

Daniels Professional Plant Food 10-4-3 is an organically based, nutritionally complete plant food, which contains all major, secondary, and minor mineral elements in available (chelated) form. The nitrogen complex in Daniels is present in four (4) forms: soluble organic N, ammonium N, urea N and nitrate N. This proprietary formulation promotes fast green-up with sustainability. Strong plant and root development are the result of this formulation. The Daniels combination is highly buffered. It is effective on all substrates and water qualities.

GROWER testimonials demonstrate improved plant growth and enhanced root development resulting in healthier, more beautiful plants. In addition to enhanced plant quality, a major benefit realized by growers is the ease of use. Daniels mixes “instantly”... even in cold water. Now you can get Daniels Plant Food without paying a premium price. Standard fertilizers have gone up in price so much that in many cases, Daniels will actually save you money.

DABNEY NURSERY

Ronnie Richardson at The Dabney Nursery in Memphis, TN, purchased a pallet this past fall and used it on their fall pansy crop. After trying Daniels for the first time, Ronnie stated he will definitely use Daniels this coming spring. Compared to plants grown with other fertilizers, the Daniels grown plants were much more compact. The crop turned out great. Ronnie stated he could not ask for anything better. Daniels was very easy to mix and he was not afraid of applying too much and stretching his crop.

BONNIE PLANT FARMS

Bonnie Plant Farm is now using Daniels and Pinnacle on herb and vegetable plug production as well as their finished product. They ordered their first 4 pallets in December of 2007 and have now ordered multiple truckloads of Daniels based on the results they have seen in plant quality and faster finish times. Bonnie Plants has stated they will be using Daniels in all 45 locations.

The plants seem to root quicker, and this gives them a jump on their finished crop.

— Elzinga Greenhouse

ELZINGA GREENHOUSE

Mark Elzinga Greenhouse purchased Daniels through Elzinga & Hoeksema Greenhouse. They are now ordering multiple truckloads of Daniels and Pinnacle and are feeding everything 100%. They have used it as a heavy feed earlier and it really helps to get things going strong. The plants seem to root quicker, and this gives them a jump on their finished crop.
